Truly Affordable Document Management Solutions

Automotive

What are you doing with those reams and reams of reports, documents and information that you need to archive every month? And are you able to access it quickly and easily? Is it backed up, safe and secure? Are you printing it twice, including a set for off-site storage?

Information is the fuel that runs your dealership or group, and rapid and accurate access to secure archived data is critical. The most effective way to achieve this is through modern digital technologies for inputting, storing, retrieving and printing your critical business data.

The power of rapidly advancing technologies has been harnessed by DTI to provide a complete one-stop document management system that is safe, simple and guaranteed.

DTI's solution can help the automotive industry improve customer service and dealer communications while also reducing operations costs, including marketing. With immediate access to your documents such as your deal jackets and all items contained within, your service records, parts invoices, financials, etc., you have all the information at your fingertips to make a sound business decision.

How? The DTI platform captures, searches, and manages content regardless of source and format. DTI provides a common infrastructure, which complies with the company's legal and security requirements, for easier capture, searching, retrieving, and exchanging of information throughout the enterprise. It enables collaboration and delivery through a web environment to communicate with your employees, customers, and partners. In addition, the DTI solution can help your company get more value of your ERP, PDM, and CRM systems by "unlocking" content that was previously available only through these closed systems and adding value by linking controlled external content for online retrieval.

Benefits:

- Non-proprietary system allows interfaces with almost any other system you may have
- Web based system negates the need for multiple broadband connections between dealerships
- Unlimited users – No more having to pay for multiple users to access your own documents!
- It provides extensive flexibility to index, locate and deliver any document to any PC at any time
- Access information more easily
- Facilitate collaboration
- Gain greater control of information
- Streamline business processes

Recognizing that return on investment is an important factor in any decision, we can lower your total cost of ownership while offering a solution that will provide the most dependable, mission-critical technology for your automotive information and service needs.

By choosing DTI, you will find an organization and product that are committed to providing high quality service and product offerings, and most importantly, an organization that puts servicing the customer with integrity first.
